iX Cameras Expands Sales Network to Mexico

iX Cameras of Woburn, MA and Rochford, UK, a leading developer and manufacturer of high-speed imaging technology, is proud to announce a sales and distribution partnership with SLAM International of Queretaro, Mexico. Under the terms of the partnership, SLAM International becomes the exclusive distributor for iX Cameras in Mexico.

Jonathan Hatton, Director of Business Development for iX Cameras said, "The partnership with SLAM International reflects the iX Cameras strategy to grow by developing relationships with professional organizations focused on providing best product knowledge and service to our customers. We look forward to working with Paul and his team at SLAM International to build on the iX Cameras success in Mexico."

SLAM International was founded by Paul Laureano, a veteran of high-speed imaging with experience in a wide range of industries from scientific, industrial, military and automotive. Today under Paul's leadership, the SLAM team of professionals service their diverse clients in Mexico and across South America. Paul added, "We are very excited to partner with iX Cameras. We feel the quality of the products and the reputation of iX Cameras along with the advanced technology of the cameras will be welcomed by our customers".

About iX Cameras

iX Cameras is a world-leading technology and product company specializing in the field of high-speed (slow motion) imaging. Based on proprietary innovative technologies, we design, build and sell cutting-edge ultra-fast cameras and software for a wide range of advanced scientific research applications. The company is a wholly-owned spinoff of the heralded Olympus industrial division, combining the acumen of the engineering visionaries from Olympus with a new team of industry veterans, continues to innovate state-of-the-art i-SPEED cameras under the iX Cameras name. Sales, service and support of all i-SPEED camera models can be obtained from regional offices located in the United States, United Kingdom, China and India.
